Perform the following triggers and constraints on the given database.

Triggers

Write a before insert trigger to verify a student has already enrolled in different regions if it is about to be inserted in Took table, if yes, raise exception "Can't study in different regions". (Exception message is optional)

Constraints

   a. In Took table, write a constraint to check score is from 0 to 100.
   b. In Student table, write a constraint to check major should not be null and it should be either 'CS' or 'EE'
